Subject: enviromental impact study for intermdal

Dear Mr Marx,

I would like to have you consider an EIS study for the intermodal site near Gardner. I do believe that some flaws that would impact our community were overlooked, concerning the water and the air pollution studies. I would also urge you to have a meeting for public comment on this study before you issue a final 404 permit. We live very close to this intermodal site and have a strong intrest in our living the best and heathiest years of our and our childrens and grandchildrens lives.

Thank you for considering this, and putting your self and your family in our shoes here in rural Gardner.

Larry and Donna Pearce
